DESCRIPTION OF CHEESES

Country of origin		ISO country code
Made with the milk from the following species of animal		
Nature of commodity	Cheese. HS code(s): 04.06.	
The cheeses have been produced from [please tick relevant statement]	Raw milk which has not undergone any heat treatment or any physical or chemical treatment during the manufacturing process, that would mitigate specific risks, including pasteurisation	

Raw milk which has been submitted to a treatment involving a single heat treatment with a heating effect at least equivalent to that achieved by a pasteurization process of at least 72°C for 15 seconds and, where applicable, sufficient to ensure a negative reaction to an alkaline phosphatase test immediately after the heat treatment

I, the undersigned, declare that the information supplied above is correct and that the dairy products described:

a) were produced from raw milk which comes from animals belonging to herds free or officially free of brucellosis and tuberculosis which do not originate in any area of the country subject to official restrictions for notifiable diseases;

b) have not been obtained from animals showing a positive reaction to the test for tuberculosis or brucellosis;

c) are not derived from animals known to be infected with a pathogen which causes a notifiable disease according to the European Regulations or the Animal Health Regulations of the exporting country;

d) come from (an) establishment(s) which holds a sanitary registration number/health mark number, or if the country of origin does not issue registration numbers have attached proof that the establishment is producing cheese by sanitary means as authorised in their country;

e) comply with the public health requirements in the country of origin listed above and are suitable for human consumption.
